In Class Exercise : String Manipulation and struct data type
Name and last name :

==========

Program Statement: Write a program that reads a sentence (maximum 82 characters) from command line and prints the following (**Note**: Use as many as function as possible; that is the main part of the program should not exceed a couple of lines).

a) Number and sum of digits in the sentence and
b) Histogram showing the repetition of each digit (0-9).

A sample output:

```
Today, October 21, 2025, we are tested on Homework1 by reading a sentence up to 82 characters and printing histogram of digits: 0, 1, 2, …, 9
```

```
There is a total of 13 digits, and the sum of the digits is 35.
```

```
Histogram Part:
--------------------------------------------------------------------------------
Digit 0:  **
Digit 1:  ** *
Digit 2:  ** **
……

Digit 8: *
Digit 9: *
```
