DSE501 : Introduction to Data Science Tools
Prepared by : Prof. Dr. Hasan DAĞ
Date Assigned : 08.10.2026
Date Due : 15.10.2026 by midnight (23:45)
Exam Type : **Hwk 1a.** (Only use of arrays is permitted)

==========

Program Statement: Write a program that reads personal data and address data for the instructors from a data file (max. 50 records, data belonging to instructors) named as ***DSE501_Hwk1*_Instructors.txt** and *inserts them into* ***arrays in a sorted manner*** *(or sorting can be done after all insertions) with respect to the age. Then print the whole data to the screen. Reading data from a file line by line, breaking every line into pieces, inserting the pieces to the relevant data structure, sorting the data, and finally printing the data shall all be done by separate functions. That is, your main program is expected as short as possible. To this end, you are required to develop a library file (.h file) called* ***NameLastname_DSE501_Hwk1_Library.h*** *as well.*

Please name your Homework1 code file as ***NameLastname_ DSE501_Hwk1a.c*** *(failure to do so will cause a deduction of 5 points) and upload both the library the file and your homework file as a single zipped file to* ***learn.khas.edu.tr***

The content of a sample ***DSE501_Hwk1*_Instructors.txt**
(Name, Last-name, Age, Gender, Street Name, Street Number, City, Country)

Notes:

1. This homework requires a good understanding of the topics below.
   a. Strings and character manipulation,
   b. Arrays
   c. Files
2. Submission of the homework does not guarantee a grade, everyone is expected to defend verbally, or in a written way (such as Quiz) how, and why certain pieces of code (randomly selected by the instructor) used.
3. Any kind of act of plagiarism (borrowing from your friend, having homework is done by ChatGPT, or having someone do the homework for you etc.,) **is going to be dealt with formal misconduct procedures**.
